Introducing An Interactive PreSet Hub Training CD from Consolidated Metco

As a way to better serve customers across the country, ConMet has introduced a new interactive PreSet® hub training CD-ROM designed for service technicians.

"This CD-ROM allows technicians to become familiar with the proper service procedures for our industry standard PreSet wheel hub technology. Technicians can complete the hub training on their schedule, at their location with virtually the same content provided by our regional service managers in a more formal on-site training session," explains Larry Sanford, National Sales Manager for ConMet. "It offers the greatest flexibility to the Director of Maintenance, who is constantly trying to keep his technicians up to date with the latest service information without taking them off the shop floor for extended periods of time."

The new training program instructs technicians on the proper identification, removal, servicing and reinstallation of ConMet's PreSet hub assemblies. Users answer questions at the end of each chapter and are notified of their overall score. After successfully completing the training session and correctly answering the questions, the user is able to print out a customized PreSet hub training "certification of achievement."

"This CD-ROM provides access for our customers, both large and small, to the training they need to properly service PreSet hubs," notes Sanford. "It can be used by itself or in conjunction with a training session conducted by a ConMet Service Manager."

The 45-minute training session uses realistic animation to illustrate and explain detailed instructions on such subjects as:

- Inspection and preventative maintenance
- Lubricant requirements
- Hub removal and disassembly
- Functional checks

If you would like to receive the ConMet Connection via e-mail, just e-mail us at ConMetConnection@conmet.com or visit our web site at www.conmet.com to sign up.

- End play measurement
- Inspection, repair and replacement of hub and hub components
- Hub pilot vs. ball seat wheel mounting systems

The interactive CD provides the user with options such as fast forward, rewind, freeze frame, "go to end" and "go to start" buttons. Other options include volume control and a main menu button. Users can go directly to any chapter or section at anytime during the training session. Chapters include:

- Wheel End Options
- Introduction to ConMet PreSet Hub Assemblies
- PreSet Inspection and Preventative Maintenance
- Hub Removal and Disassembly
- Inspection, Repair and Replacement
- Reassembly
- Reinstallation

A "Frequently Asked Questions" (FAQ's) section is available at the end of the training program to help answer some of the many questions technicians have for servicing PreSet hub assemblies.

An appendix is also included and provides necessary charts, bulletins, phone numbers and part numbers to aid in the servicing of PreSet hubs.

To get your PreSet Hub Training CD, call 800-547-9473, send an e-mail to [ConMet Connection@conmet.com](mailto:ConMetConnection@conmet.com) or go to www.conmet.com.

ConMet's new interactive training CD-ROM helps technicians learn how to service PreSet hub assemblies.

Aluminum PreSet® Hub Assembly

Upon completion of the PreSet Hub training, users can print a customized certificate.
